

# EPOMIX PSA 1003

Strength Enhancer, Water Reducer and Grinding Aid Cement Admixture

## PRODUCT DESCRIPTION

**EPOMIX PSA 1003** is a universal admixture that can be used in all types of cement as a grinding aid and quality enhancer. An admixture that can optimize the clinker usage by improving early and final compressive strengths.

## ADVANTAGES

- **EPOMIX PSA 1003** increases the hourly production in the mill and maintains a fine and homogeneous particle size distribution.
- By influencing the hydration reactions increases the durability of cement and optimize the clinker use
- Increases the early and final compressive strength by min 15-20%
- Reduces grinding energy coasts

## APPLICATION

Grinding of cements types from CEM I to CEM V

## METHOD OF USE

Industrial trials are required to determine the optimum dosage. A dosing pump is required to introduce the correct dosage of **EPOMIX PSA 1003** into the mill

**EPOMIX PSA 1003** can be fed directly into the mill or onto the feed conveyor belt by dripping. The dosage nozzle should be periodically checked to prevent blocking up.

## PRODUCT DATA

<b>Form</b>	Liquid
<b>Colour</b>	Dark Brown
<b>Consumption</b>	0.03 – 0.15 % of cement weight (Depending on the previously made trials)
<b>Packing</b>	Drums / Bulk
<b>Shelf Life</b>	<b>EPOMIX PSA 1003</b> should be kept original closed packaging. Protect from excessive cold and freezing. Avoid direct air contact. Store in clean and dry tanks or containers, if possible discharge in closed systems.

## TECHNICAL SPECIFICATION

Test Name	Average Result
Density @ 20°C	1.175 ± 0.03 Kg/Ltr
pH	8.0 ± 1.5
Cl - ions Content (%) (EN 480-10)	< 0.1

## RELEVANT STANDARDS

**EPOMIX PSA 1003** meets the performance requirements of **TS EN 197-1**
